

Manual to test FoodCASE on the Playground Environment (using bat file)

Fast way- only on Windows

1. Click on the Compiler Client and/or the Administration Client link to start FoodCASE applications (zip file). The client is the tool to compile food data, the admin tool is to manage users and different thesauri.

2. Extract zip file to the folder of your choice
3. Go to that folder and double click on the FoodCASE Client.bat or FoodCASE Admin.bat
If you get a message that Windows protected your PC, click on more info and click on the button "Run anyway".
